UP TO 96% AFUE MODELS

33-inch Modulating Gas Furnaces

FRASER-JOHNSTON®
Heating ■ Air Conditioning

Improved Performance Costs Less.

These days, energy costs and environmental issues concern everyone. Fraser-Johnston gas furnaces can reduce energy costs nearly 40% compared to furnaces that are 20 years old. And, with up to a 96% Annual Fuel Utilization Efficiency (AFUE) rating on our high-efficiency models, they have earned some of the highest ratings in the industry. You will also enjoy peace of mind knowing that your furnace is ENERGY STAR® qualified as one of the most energy-efficient furnaces you can buy!

Save Money With Minimal Investment.

Single-stage models feature a quiet, high-efficiency air circulating fan motor which operates at a fraction of the cost of traditional motors. As an added benefit, these motors can increase the overall efficiency of your complete Fraser-Johnston heating and cooling system, saving you even more money with minimal investment!

Greater Care For Your Indoor Air.

Two-stage models are available with a super-quiet, high-efficiency variable-speed ECM fan motor option which circulates air for longer periods at a fraction of the cost. Longer run times mean fewer hot and cold spots and longer periods of air filtering, resulting in cleaner and more comfortable air. Plus, fewer starts and stops make variable-speed models 24 times less noisy than conventional furnaces.

*For every 3 dB quieter, sound power is reduced 50%!

Comfort Now Has New Class.

With the Fraser-Johnston furnace line, you'll enjoy incredible comfort and the peace of mind knowing your system is built to last. With proven manufacturing processes, you can be assured our quality and dependability will endure season after season. And, trust our expert home-comfort contractors for installation and support that leave you feeling great.

Easy Service Adds Up to Long-term Savings.

These furnaces make service and maintenance easy for dealers, too. So, you not only get economy and efficiency, you'll get dependable and reliable performance for years to come.

Exceptional Warranties For More Peace of Mind.

When we build a product this good, we're happy to stand behind it. So, we back each Fraser-Johnston furnace with an exceptional limited lifetime warranty on the heat exchanger, and a 10-year limited warranty on parts. Must be registered online within 90 days of installation otherwise the parts warranty reverts to a 5-year limited parts warranty.

Have Your Fraser-Johnston Dealer Specify the System that Performs Best For Your Home.

AFUE model meets ENERGY STAR® requirements for energy efficiency.
